An inverter or power inverter, refers to an electronic device that converts direct current (DC) into alternating
 current (AC). In our daily life, we often convert 110V or 220V AC power into DC power for use, while the
 inverter plays the opposite role. In other words, the inverter is used to convert the 12V, 24V or 48V

Without solar anti-islanding protection, your solar panels will continue to send voltage back to the grid, which could damage the grid hardware and lead to other costly losses. 3. Solar anti-islanding prevents inverter damage. Solar islanding could cause damage to inverters, rendering them non-functional.
