

Who is Kiribati green energy solution?

Kiribati Green Energy Solution, a State-Owned Enterprise was established on 14 November 1984 under the Company Ordinance Cap 10A. It is a leading Government implementing agency in the energy sector deal with any renewable energy initiatives in Kiribati.

What is Kiribati integrated energy roadmap (Kier)?

The project is implemented by UNDP in partnership with the Government of Kiribati. The main objective is to enhance the outer island development through the achievement of renewable energy (RE) and energy efficiency (EE) targets of Kiribati as stated in the Kiribati Integrated Energy Roadmap (KIER).

Why was Kiribati solar energy company renamed in 2020?

In 2020, the reformation and renaming of the Company (commonly known then as Kiribati Solar Energy Company) was conducted with the core objective is to broaden its scope in providing services with renewable energy including solar energy, wave energy, wind energy and other RE technologies that is applicable in Kiribati.

Does Kiribati need electricity?

As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures. Yet the current fossil fuel-based power system is inadequate to meet future demand.

Who generates electricity in Kiribati?

Sector context. Grid-connected electricity in Kiribati's capital, South Tarawa, is generated and distributed by the Public Utilities Board (PUB), a state-owned electricity and water utility.

Why are there no independent power providers in Kiribati?

Also, despite the potential for revenue generation from the high electricity costs, there are currently no independent power providers in Kiribati. Barriers to private sector investment include (i) lack of an enabling policy and regulatory framework, (ii) credit worthiness of PUB as an off-taker, and (iii) small transaction sizes.<sup>8</sup>

Increased solar generation will benefit the economy through reduced importation of fossil fuels and placing downward pressure on tariffs. Utilization of renewable energy also reduces GHG emissions which contribute to global warming and rising sea levels that render Kiribati among the most vulnerable. The project is

The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the deployment of solar PV should be continued and complemented with and improvement of efficiency in Kiribati's entire energy system, including electricity use, heating, cooling, and ...
