

How much does a solar project cost in Argentina?

The electricity from the Cauchari solar project will be sold to Argentina's electricity wholesale market administrator Compa a Administradora del Mercado Mayorista El ctrico (CAMMESA) at a price of \$46 per MWh under a 20-year power purchase agreement (PPA).

How many solar panels are there in Argentina?

In 2019, this project was inaugurated with over 1,000,000 solar panels generating power for 160,000 homes. At its onset, the project consisted of three individual PV fields, the Caurachi I, II, and III. With a new expansion, it will be able to provide electricity to 260,000 homes while also creating new jobs for local Argentinians.

What is the largest solar project in South America?

Paneles solares instalados en Cauchari III, licensed under the Creative Commons Attribution-Share Alike 4.0 International license. Sign up for daily news updates from CleanTechnica on email. Or follow us on Google News! The largest solar project in South America is situated at over 13,000 feet above sea level in the far north of Argentina.

Does Argentina produce a lot of energy from PV?

Despite the success of this project, and the fact that Argentina is considered an ideal location for PV development, the country produces almost none of its energy from PV. The energy mix from 2019 showed that Argentina used 89% fossil fuels, 3.9% hydroelectric, 2.8% nuclear, and the remaining encompassed all other sources of energy creation.
