

6 ???· The government has launched the country's first solar farm, a 30-MW facility 30 km from the capital, Asmara. The African Development Bank (AfDB) put out a call for tenders on ...

The solar-powered mini-grids with a 2.25 MW generation capacity providing modern and affordable energy to the rural towns of Areza and Maidma in the south of the country and 33 off-grid ...

The government of Eritrea has received a \$49.92 million grant from the African Development Bank to fund a 30 MW photovoltaic plant in the town of Dekemhare, 40 km southeast of the capital Asmara...

renewable energy such as solar, wind, and geothermal, and (iii) scale up energy infrastructure to support agricultural production, food security, and value-chain development. In this respect, the proposed project is aligned with Eritrea's development priorities and objectives notably agriculture, nutrition and food

The solar-powered mini-grids with a 2.25 MW generation capacity providing modern and affordable energy to the rural towns of Areza and Maidma in the south of the country and 33 off-grid surrounding villages is an example illustrating how public-private partnership and ownership are crucial in green energy solutions.

The Ministry of Energy and Mines in Eritrea has awarded a contract to China Energy Engineering Group Shanxi Electric Power Construction Co., Ltd. for the design, supply, and installation of a 30 MW solar PV plant. Learn more about this significant step towards bolstering Eritrea's renewable energy infrastructure.

The AfDB has awarded a contract to China Energy Engineering Group for the construction of a 30 MW solar PV plant near Dekemhare, Eritrea. The project includes solar power generation, battery storage, and new transmission infrastructure.

6 ???· The government has launched the country's first solar farm, a 30-MW facility 30 km from the capital, Asmara. The African Development Bank (AfDB) put out a call for tenders on 19 January for a 38-month consultancy contract to define the project and oversee its implementation.

The solar-powered mini-grids with a 2.25 MW generation capacity providing modern and affordable energy to the rural towns of Areza and Maidma in the south of the country and 33 off-grid surrounding villages is an ...

It will help to increase and diversify the electricity supply in Eritrea by developing renewable energy sources (solar energy), thereby reducing the cost of electricity, creating employment opportunities and stimulating business activities.
