Palau Solar designs, supplies and installs domestic solar power throughout the archipelago of the islands of Palau, east of the Philippines in Micronesia. Through a project with the Asian Development Bank, Palau Solar is transforming the islands with renewable energy.

What is an Electric Panel for Solar Plants? Electrical panels consist of various connectors and switches that regulate the current flow from the solar power plant to the circuits. In simple terms, solar panels are interconnected to one point, after which the electrical panel and the circuit breaker act as a barrier. All the appliances and electrical equipment are present after this ...
