

How much does solar cost in New Zealand?

When you're looking at Solar, we will put you in touch with two of New Zealand's top Installers. Solar panels and solar power energy systems have only gotten more affordable as the years have gone on. Just eight years ago, a 3kW system would cost you around \$40,000, while today the same system could be installed for less than \$9,000.

How many solar power systems are installed in New Zealand?

As of March 2021, 31,589 solar power systems have been installed in New Zealand. With solar photovoltaics (PV) becoming more and more popular, it's a good idea to find out if installing one of these systems on your home or business will be worth the investment.

How much does a solar system cost?

Solar panels and solar power energy systems have only gotten more affordable as the years have gone on. Just eight years ago, a 3kW system would cost you around \$40,000, while today the same system could be installed for less than \$9,000. As equipment and processes become more developed, and more efficient, prices drop, too.

Are solar panels a good investment in New Zealand?

A solar power system in New Zealand can easily earn a 10 to 15% return on investment. But this rate of return is likely to increase each year as the price of electricity continues to climb. Unsure if solar panels on your roof will be worthwhile or if the upfront cost will lead to a good payback?

How much does a 10 kW solar system cost?

On the other hand, a larger, 10 kW system can cost around \$25,000, or about \$2.5/W. Let us dive a little deeper. While solar panels steal most of the spotlight in any system, they are only one of the numerous components that make up the system. A typical solar power system consists of the following:

How do solar panels work in New Zealand?

Installing solar panels means generating and consuming your own electricity, independently. This is the most common type of solar power system in New Zealand. A grid-connected solar panel system is comprised of solar panels, an inverter, and connection components.

In 2023, a typical 5 kW solar power system in New Zealand costs around \$13,500. Like most other things, the larger a system, the lower its cost per watt. For instance, a small, 2 kW system may cost around \$7,500, which comes down to about \$3.75/W. On the other hand, a larger, 10 kW system can cost around \$25,000, or about \$2.5/W.

Individual solar panels in New Zealand cost around \$230 for a 440W panel. However, the total system cost

includes inverters, mounting systems, and installation. Find out how to choose solar panels here.
