

What is Duyunov Motors?

Duyunov Motors is a project to commercialize the unique technology of combined windings "Slavyanka". The technology allows the team of engineer Dmitry Alexandrovich Duyunov to design new generation electric motors used in electric transport, industry, agriculture, military industry, aviation, household appliances, medicine and other fields.

What is the main goal of Duyunov's Motors?

The main goal of the project "Duyunov's motors" is to make profit from the development of electric motors with the combined winding "Slavyanka" for different customers and applications. To achieve this goal, the design and engineering technology department (D&E) is being established, where "Sovelmash" will carry out the entire work cycle.

How is Duyunov's Motors funded?

The project "Duyunov's motors" is funded by means of crowdfinancing: this means that investments come from an unlimited number of private investors. The investor becomes a co-owner of the innovative business and can count on part of the company's profit by receiving dividends on his share. Any person from any place in the world can invest.

Duyunov's hub motor is distinguished by durability and long service life, its production cost is 30% lower, it's also cheaper to maintain. Vehicles with the hub motor demonstrate increased travel ...

The highlights of the year in the project "Duyunov's motors" 26 December 2023 "Partner Race"; join the epic status battle! The main challenge of the season among our partners 15 November ...

One of the cornerstones of the project's uniqueness is the patented "Slavyanka" technology, which is applicable to various types of induction electric motors. The technology's developer is the Russian engineer Dmitry Duyunov.

The highlights of the year in the project "Duyunov's motors" 26 December 2023 "Partner Race"; join the epic status battle! The main challenge of the season among our partners 15 November 2024 Launching the functionality in the following countries: Tunisia, Morocco, Mauritania, Guinea, Chad, CAR, Djibouti An important step towards acquiring the ...

o A bridge crane was delivered to the motor assembly shop. o Trays for electric cables were installed on the third floor of the production building. o Earthwork continued to lay the main pipe of the storm water drainage system.

Duyunov's hub motor is distinguished by durability and long service life, its production cost is 30% lower, it's

also cheaper to maintain. Vehicles with the hub motor demonstrate increased travel distance.

Investments in the project "Duyunov's motors" are attracted by crowdfunding, which is otherwise also known as collective funding. This means that funds for the project implementation come from small and medium-scale investors.

The technology allows the team of engineer Dmitry Alexandrovich Duyunov to design new generation electric motors used in electric transport, industry, agriculture, military industry, aviation, household appliances, medicine and other fields.
