

International solar developer Dharma Energy announced today that it has secured long-term funding for the 87.5 MWp Athies-Samoussy site, the largest solar park in the Hauts-de-France region of northern France.

With its state-of-the-art 100 MW manufacturing facility, we make mono/multi crystalline solar photovoltaic (PV) modules which supply sustainable solar electric power to both on-grid and off-grid residential and commercial establishments.

French company SolarinBlue has been awarded EUR6m (\$6.44m) by the French Government for its offshore solar project as part of the France 2030 programme. The programme, operated by the French Agency for Ecological Transition, ADEME, will support the Méga Sète pre-commercial demonstrator project for a floating solar farm in the Sète-Fontignan ...

From May 17 to 21, Energy Observer made a stopover in Saint-Pierre-et-Miquelon, a French group of islands off the coast of Terre-Neuve, Canada. The stopover represented an important moment for the local community, who had the opportunity to discover the technological innovations on board up close, and to consider their own energy future.

AFD is cofinancing the largest solar power plant in New Caledonia to allow cleaner energy to be generated. 43,000 photovoltaic panels will be installed, with a capacity to produce electricity for the equivalent of 5,400 households.

BW Solar's mission is to play an active role in the energy transition by empowering communities to rely on clean energy to power their lives. Being a privately held company gives BW Solar the agility to adapt to the fast-moving regulatory and technological landscape.

New construction in Saint Pierre and Miquelon adheres to strict energy efficiency standards, with incentives for buildings that incorporate passive solar design, improved insulation, and efficient heating systems.

Saint-Pierre et Miquelon est donc l'un des territoires pilotes pour ce projet européen autour de la transition énergétique lancé la semaine dernière.

Saint Pierre and Miquelon: Many of us want an overview of how much energy our country consumes, where it

comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
