

Many Israelis started to purchase solar water heaters. In 1980, the Israeli Knesset (Israeli Parliament) passed a law making solar heating mandatory for new residential buildings. The law has saved Israel and its citizens millions of shekels in energy costs.

Today 90% of homes in Israel use a solar water heater. And because so many units are manufactured and installed each year, they're incredibly cheap. In Israel a solar water heater costs just \$700 .

OverviewHistory and developmentFeed-in tariffEducational and research facilitiesSolar power stationsFinance and businessSee alsoExternal linksThe use of solar energy began in Israel in the 1950s with the development by Levi Yissar of a solar water heater to address the energy shortages that plagued the new country. By 1967 around 5% of water of households were solar heated and 50,000 solar heaters had been sold. With the 1970s oil crisis, Harry Zvi Tabor developed the prototype of the solar water heater now used in over 90% of Isr...

Tigi, a company based in Hod Hasharon, central Israel, has added a vital ingredient to the original solar water heater so it can now operate even in cold climates - and instead of heating water just to shower temperature (around 40C), it ...

Elsol's solar and electric water tanks are available in a variety of volumes, from 30 to 300 liters. Water tanks are obtainable in vertical or horizontal versions.Our unique production process incorporates automatic submerged arc welding, an extremely advanced technique, used mainly in production of high-pressure tanks.

Millions of Israelis use 1950s tech rooftop solar devices for their hot water. Israel's Tigi Solar (see here previously) has developed cellulose triacetate insulation that can heat the water to 100 degrees Centigrade, even in freezing winter conditions. It has installed 40 international commercial systems.

The use of solar energy began in Israel in the 1950s with the development by Levi Yissar of a solar water heater to address the energy shortages that plagued the new country. [1] By 1967 around 5% of water of households were solar heated and 50,000 solar heaters had been sold. [1]

To cater with the demand of the heaters, a number of solar water heater manufacturers have established their roots in Israel. This is in addition to the suppliers of the same water heating systems. Here is a list of the top solar water heater manufacturers and suppliers in Israel.
