

How many solar projects are there in Bulgaria?

Currently, Bulgaria operates over 800 megawatts of wind projects. Bulgaria has an annual average of 2,100 hours of solar irradiation. As of 2023, over 1,700 megawatts of projects are operational in Bulgaria, and it is growing substantially. Geothermal energy is gaining attention, with legislative proposals to harness Bulgaria's geothermal potential.

When did smart solar - EOOD start producing electricity in Bulgaria?

On April 15, 2011, SMART ENERGY GROUP's first own 2MWp photovoltaic plant in the village of Rakovskovo was connected to the country's energy system and began producing electricity for the Bulgarian market. We thank SMART SOLAR - EOOD for the demonstrated high professionalism, use of new technologies in the field of solar energy.

What services do we offer in the construction of solar installations?

We offer a whole range of services related to the construction of solar installations - from research and evaluation to installation, maintenance and service. We strive to provide high-quality alternative energy solutions tailored to the needs of our customers.

We specialize in the construction of photovoltaic systems for business, home and solar power plants. We provide reliable and cost-effective solutions for the use of renewable energy for the needs of our customers in Bulgaria and the European Union. We are your trusted partner for turnkey solar systems projects at all sizes.
