

What makes Czech Republic a great country for solar energy?

There is a long list of solar energy equipment manufacturers and suppliers in Czech Republic. This makes it possible for the country to have a high share of the renewable energy market in Europe and worldwide. In fact, some of the biggest manufacturers and producers of solar panels and technology are serving the Czech market.

How is the solar industry growing in Czech Republic?

In Czech Republic, in particular, the solar industry is experiencing a massive growth period. There are more households and businesses that have installed solar roof panels. Czech Republic held a 19% share in renewable energy for electricity generation. They are expected to increase the share to 22% by 2030.

What is the future of solar energy in Czech Republic?

In the 2021 Solar Conference, Industry and Trade Minister Karel Havlicek reveals that the future is bright for the solar energy market in Czech Republic. The country plans to move away from coal as its main power source and they are looking at renewable sources as a viable option for replacement.

Who makes solar panels & inverters?

The company SOLSOL s.r.o. has operated on the Czech market since 2012. It deals with the wholesale of solar panels and inverters. Since 2013, it has been an exclusive partner of the Taiwanese company AUO (formerly BenQ), which produces high-efficiency mono-photovoltaic modules at a plant in Brno with the capacity of 200 MWp/year.

What is a solar inverter?

The solar inverter or inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used. We offer classic or hybrid (mains and battery) inverters with different performance and characteristics.

Why should you invest in photovoltaic technology in the Czech Republic?

Over the years, we have become a stable leader in the sale of photovoltaic technologies in the B2B segment in the Czech Republic thanks to excellent know-how and a dynamic approach to the latest technologies. We are gradually expanding and becoming a significant player in foreign markets as well.

A solar inverter, also known as a PV inverter, is a type of electrical converter that converts the variable direct current (DC) output of a photovoltaic (PV) solar panel into a utility frequency alternating current (AC) that can be fed into a commercial electrical grid or used by a local, off-grid electrical network.

We have been building and servicing solar and hybrid power plants since 2006. We have customers not only in the Czech Republic but also in other countries (United Kingdom, Slovakia, Hungary, Romania, Spain,

Turkey, Ukraine, Kazakhstan, Russia). We are a Czech company with a strong background, and we have our own team of professionals and ...

The company deals with the wholesale of solar panels, inverters and batteries from the world's leading manufacturers. Our company is delivering to the Central and Eastern European region in container, pallet and custom size projects both solar panels and inverters of many Tier1 and European brands such as Canadian Solar, Trina Solar, AEG ...

We bring the best solar technologies from leading global manufacturers to the Czech and European markets. Our portfolio includes only verified, reliable, and safe technologies that hold international certifications and quality awards. For ...
