SOLAR PRO. Solar loan in Finland

Does Finland have solar energy?

Contrary to popular belief, Finland's solar energy potential doesn't fall short of that of Central Europe. In the summer, the long days and nearly round-the-clock sunlight compensate for the dark winters. This article's Finnish version was first published in February 2019 and has been updated in June 2023.

Why should you choose solar Finland?

Solar Finland and its subsidiaries with strong long-term background are experts in all aspects of solar energy. Our extensive know-how and experience of over 40 years make it possible to develop in different areas making our products and services competitive in the solar energy markets both domestically and abroad.

How much solar energy will Finland produce by 2050?

LUT has modeled an emission-free energy system and demonstrated that the share of solar energy in Finnish energy production should rise to 10 percentby 2050. That would mean a leap from the current 635 megawatts to 35 000. The rooftop potential of all Finnish buildings (residential,administrative,industrial) is about 34 000 megawatts.

Is solar energy a viable alternative to self-consumption in Finland?

In Finland, solar electricity has so far been a financially competitive alternative only if the self-consumption rate has been high. Now, however, the situation is changing, as solar farms are being built to produce electricity to sell directly to the main grid. Globally speaking, solar energy generation is a massive business.

Can solar power improve the profitability of buildings in Finland?

LUT University has investigated how the profitability of solar electricity could be improved in different types of buildings in Finland. Researchers have debunked myths related to the orientation and dimensioning of solar photovoltaic systems and sales of surplus electricity.

Does Finland have more solar power than Germany?

At an annual level, however, Finland gets roughly as much sunshine as countries such as Germany or Denmark. However, Germany produces 110 times more solar electricity than Finland, Denmark five times more, and Sweden four times more.
