From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

Is Georgia a solar-friendly state?

Georgia is one of the solar-friendliest states in the nation, with an average of 218 sunny days each year. This ample access to sunlight allows Georgia to make the most of solar energy production throughout the state. Georgia currently ranks 9th in the U.S. for solar energy production.

How can I support the development of solar power in Georgia?

Sign up now and get the opportunity to support the development of solar power in Georgia by subscribing to a portion of local solar farms. Every month you'll receive energy credits on your monthly bill based on the solar farm's production. Want to become a corporate sponsor? Help make renewable energy available to income-qualified customers.

Does Georgia Power Company offer a solar extension program?

The Public Service Commission Order pertaining to Dockets 4822, 16573, and 19279 states that Georgia Power Company is to provide existing solar participants the option to extend the term of their current Distributed or Utility Scale generation for up to 35 years. Please select from the following options for more information surrounding your program.

Do all solar facilities belong to Georgia Power?

Not all solar facilities you may come across belong to Georgia Power. We have constructed and are operating 16 solar farms and additional demo facilities across the state of Georgia, many in partnership with military installations. The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia.

What are the incentives to switch to solar energy in Georgia?

Georgia offers incentives to encourage its residents to switch to solar energy. The Solar Power Free-Market Financing Act of 2015 established a program that reduces or even eliminates up-front costs of going solar for homeowners through financing arrangements with private solar providers.

Rooftop Solar. Solar energy systems are wired behind a customer's meter when they are planning to offset their energy usage from the grid. Our goal is to provide you with information to help you make an informed decision on whether or not solar is a good option for your home and the next steps if you would like to move forward with a solar installation.

for electricity generation. Georgia has experienced rapid growth in the solar sector, largely driven by utilities and utility-scale projects. In 2012, Georgia had negligible solar generation capacity. By the end of the first quarter of 2023, the Solar Energy Industries Association (SEIA) ranked the state 7th in the country
