

How will a solar plant benefit the Vatican?

The Pope has given full authority to two special Commissioners to supervise the plant's construction, ensuring that the project is carried out efficiently and effectively. The energy generated by this solar plant will cover all the Vatican's energy needs, eliminating dependence on non-renewable energy sources.

Who is solar Panda?

Solar Panda is an innovative company providing home solar systems to rural African communities without access to electricity. Our loan-to-own model allows millions of families to have electricity for less than the daily cost of kerosene and mobile phone charging.

Where is Vatican Radio's New solar power plant located?

The plant will be located in Santa Maria di Galeria, some 11 kilometers from Rome, where Vatican Radio's broadcasting station is located. Not only will this project generate renewable electricity, but it will also be integrated with the land's agricultural needs, combining modern technology with sustainable practices.

Does the Vatican need a solar plant?

The implementation of a solar plant not only improves the Vatican's environmental sustainability, but also offers economic and social benefits. By generating its own energy, the Vatican can save on light. This is especially relevant in a context where the price of light is a constant worry for many.

Why should you buy a solar Panda kit?

Solar Panda offers competitive, affordable products. With payment options like daily payments or buying the product outright, Solar Panda kits save money while replacing harmful kerosene and costly mobile phone charging. Solar Panda's products are designed with the long-term in mind.
