

Why should you install solar panels in Estonia?

The energy productivity of solar panels installed in Estonia is equivalent to the southern countries, as Estonia's cooler climate increases the efficiency of solar panels. We offer our customers turnkey construction of a solar park, starting from the design to the connection point, the construction of substations.

Did Estonia introduce a new solar policy?

Yes, Estonia introduced a new policy for solar and renewables in June 2018. This policy led to the deployment of approximately 90 MW of solar power, bringing the cumulative capacity to around 107 MW by the end of 2018.

How much solar radiation does Estonia produce a year?

In Estonia, the amount of solar radiation is comparable to Central Europe; the average amount of radiation has an optimal slope and azimuth of 1100-1200 kWh/m², 85% of which falls between April and October. An optimally installed 1 kW PV plant produces 900 to 1000 kWh of energy per year.

Solar Full Roof(TM) päikesepaneelidega autovarjualune kaitseb sõidukit ja toodab puhast energiat. See on ideaalne lahendus neile, kes omavad elektriautot või plaanivad selle soetamist. Avasta
