

Solarma est une entreprise innovante spécialisée dans la fourniture de solutions solaires et électriques de haute qualité ; Madagascar. Nous travaillons avec des projets sur mesure mais aussi avec des solutions dimensionnées comme des solutions anti-ghosting.

Three large-scale heavy fuel oil (HFO) plants in Madagascar are being hybridised with solar PV thanks to a USD 6 million bridge loan from REPP to develop Lidera Green Power (Lidera). Currently, 75% of the country's power is ...

EGE provided 270 EOS Poly 350W panels, which together delivered a total capacity of 94.5kW. The end result is a highly reliable solar power system that meets the energy needs of the commercial and industrial facilities it serves, ...

Madagascar is one of the sunniest countries in the world with more than 3,000 hours of sunshine per year, so decentralised solar power supply to rural areas is not only easier but also cheaper. Atmosfair finances the construction and operation of decentralised solar power grids ('solar mini-grids') in the southwest of the island

Innovative financing models, including pay-as-you-go systems, are making solar energy more accessible to a broader segment of the population. The government of Madagascar has also released a call for proposals for the construction of solar photovoltaic power facilities with a combined capacity of 210 MW.

Three large-scale heavy fuel oil (HFO) plants in Madagascar are being hybridised with solar PV thanks to a USD 6 million bridge loan from REPP to develop Lidera Green Power (Lidera). Currently, 75% of the country's power is generated from expensive and high-emission HFO and diesel plants, but the government is keen to reduce dependence on ...

Thanks to the country's impressive solar potential, Madagascar is well-placed to achieve this goal with the help of a few schemes and initiatives... As it stands, the import duty and VAT exemptions on solar panels and lithium batteries coming into Madagascar are helping increase the uptake of PV systems -- and large-scale PV projects are ...

EGE provided 270 EOS Poly 350W panels, which together delivered a total capacity of 94.5kW. The end result is a highly reliable solar power system that meets the energy needs of the commercial and industrial facilities it serves, thus ensuring uninterrupted operations and significant cost savings over time. Conclusion
