

Solar panels for my business Solomon Islands

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

How many solar homes are there in the Solomon Islands?

"Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received over 6,000 applications to obtain only 2,000 solar home systems," said Mr Aimaema.

How easy is it to do business in Solomon Islands?

According to the latest World Bank annual ratings, Solomon Islands is ranked 136 among 190 economies in the difficulty of doing business. This is a deterioration from the rank of 115 in 2018.

We design our solar systems for Solomon Island's hot temperatures and remote, rural conditions. We only use GEL lead acid or Lithium batteries; quality components from manufacturers like Victron Energy, and we ensure that we "oversize" the ...

Solar energy can help save you money on your electricity bill by replacing some of your consumption from the Solomon power grid. Solar power systems have no moving parts, are extremely reliable, and have a long expected life span. They are self-cleaning, easy to install and require very little in the way of maintenance.

Types of Solar Power Systems

Illegal Connection of Power; Types of Meters; Archive; Projects. Tina River Transmission System - 66kV Transmission Lines; Solomon Islands Electricity Access and Renewal Energy Expansion Project; Solomon Islands: Solar Power Development Project; Solomon Power Solar Projects; Old Lungga Electrical Upgrade Projects; Honiara Power Station ...

Solomon Island solar panel installers - showing companies in Solomon Islands that undertake solar panel installation, including rooftop and standalone solar systems. 2 installers based in Solomon Islands are listed below.

Explore the solar photovoltaic (PV) potential across 2 locations in Solomon Islands, from Noro to Honiara. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations.

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or business premises. Sources of renewable energy can include solar photovoltaic cells (PV) or micro-turbine systems.

As a customer, you get to benefit from the hundreds of solar power systems that our team has installed for customers around Solomon Islands. Seeing the sad environmental costs of dumped low-quality batteries, and the failure of PV systems due to poor workmanship has had a strong influence on why we prioritise quality over price.
