

Can a house of worship use solar panels?

Neumann added that houses of worship are perfect places for solar panels because during the week, when the building isn't used as much, their clean energy can be used by households and businesses in their community, but on Sundays or holy days, they can tap the solar to power their own building with clean renewable energy.

Should churches invest in solar panels?

Prior to installing solar panels, Neusch, the senior leader of the pastoral team at the church, had done extensive research and considered the long-term benefits of the investment. He said solar saves his congregation money and sends a message that they care about the environment.

Why did a church use PACE to finance a solar array?

Taylor explained that a church in Fort Worth used PACE to finance a solar array on a newish building and an older church in Houston that had an aging underperforming HVAC system with ventilation and moisture issues, addressed their facility needs and added solar through PACE.
