

The \$200 million power plant, developed by HDF, will use local sources of clean energy to supply 100% renewable, dispatchable power to 10 000 households at a lower cost than the diesel power plant.

Voltalia noted it is the sole winner in the fifth round of the CRE 4 tender for ground-based solar projects in French Guiana. Its project will receive a guaranteed selling tariff for 20 years.

Voltalia currently operates solar, hydraulic, biomass and storage power plants in French Guiana with a combined capacity of 31 megawatts, allowing the coverage of nearly 10% of the main electricity grid consumption.

The French company owns the project together with Banque des Territoires, part of France's Groupe Caisse des Depots. The partners have in place a 25-year contract with a secured tariff starting from the commissioning of the power plant.

French renewable energy company Voltalia has completed the expansion of a renewable energy plant in French Guiana, adding a battery energy storage system (BESS) of 10.6MWh. The Paris-listed company announced ...

CNES is financing the construction of the plant, which will cost EUR5 million and benefit from the French Recovery Plan. The solar power plant is expected to be operational by June 2023.

French renewable energy company Voltalia has completed the expansion of a renewable energy plant in French Guiana, adding a battery energy storage system (BESS) of 10.6MWh. The Paris-listed company announced the commissioning of the Sable Blanc solar-plus-storage project yesterday (10 May).

The Paris-based company secured the project in a government tender for solar projects in non-interconnected zones (ZNIs) in May 2021. The guaranteed tariff contract for the plant's output will be valid for 20 years.
