

M Energy has already undertaken all the preliminary work to prepare and obtain Zoning and Urbanistic Technical Conditions as well as all other necessary permits, licences and certificates for the start of construction of the solar power plant ...

The government of Montenegro in a session on Monday gave the green light to a local company to start a detailed development of a 150-MW solar photovoltaic (PV) project in the southern part of the Balkan country.

Next year, Montenegro will increase the production of electricity from solar power plants to 41 GWh from 3.8 GWh. The total installed capacity of photovoltaic facilities is expected to grow to 50 MW from 3 MW.

The DW1800 solar power station is a unique device with a maximum power of 1800W and a battery capacity of 1380. Charging via the network or via a solar panel. There is enough electricity always and everywhere. The product is equipped with a built-in...

CWP Europe plans to install the Montechevo solar power plant with a total capacity of 400 MW at Lastva, Cevo and Prentin Do on the territory of Montenegro's historic capital Cetinje, in an investment valued at EUR 360 million.

The future solar power plant is seen with 186.1 MW in peak capacity and 140.3 MW on the grid. New Age Energy Tri submitted an EIA study in June for a location in Trepca in Niksic. It obtained the urban planning and technical requirements early this year.

Montenegro's transmission system operator, CGES, has taken a significant step towards a greener future by signing a contract to connect a solar power plant with an impressive total installed capacity of 87.5 MW.

State-owned coal and power producer Elektroprivreda Crne Gore (EPCG) received urban planning and technical requirements from the government in Montenegro for a solar power project with a peak capacity of 47 MW in Niksic.
