

How does a solar installation scam work?

How the scam works: People posing as solar installers or utility employees call or come to your home and offer free solar panels through made-up government programs or incentives. Sometimes they also claim their company will cover the cost of installation by providing huge rebates.

Should you choose a reputable solar energy company?

When temperatures rise, utility costs do, too. While reputable companies can help you save money with clean or solar energy improvements, scammers offer more than they can deliver.

What should I do if I see a Solar scam?

There are consumer protection resources available if you see a solar scam or become a victim of one. Report misleading ads on social media: For starters, if you see false or misleading advertisements or claims from a solar scammer on social media, flag the post for removal.

Where can I find a reliable solar company?

Reliable resources include the Solar Energy Industries Association's (SEIA) national solar database and the Interstate Renewable Energy Council's (IREC) solar licensing database. We have performed extensive research using our strict rating methodology to suggest the most trustworthy solar companies.

Be aware of solar energy scams - everything from scammers pretending to be affiliated with the government or utility company to businesses misrepresenting the cost of improvements, savings, and financing options.
