

Are solar-powered ceiling fans a good idea?

These outdoor solar-powered ceiling fans are the perfect way to keep cool on a warm day. Powered only by the powerful 40-Watt solar panel, these ceiling fans require no external power. These fans also qualify for the 30% Federal Tax rebate for solar fans, making these fans cheaper than most interior ceiling fans.

What is a solar fan?

A solar fan is a fan like any other, except that instead of getting its power from a wall socket - or, in some cases a car socket or a battery - a solar fan draws its power from a solar panel, which in turn draws its power from the sun.

Can a solar fan store power?

Usage Advice: The solar fan is solar powered, it can't store power. Please expose it to the full sun, ensure there is no shadow and press the On/Off switch, it will surprise you. The solar powered fan will automatically shut down when the sun sets. Easy to Install: No mounting hardware with the solar panel.

Which solar-powered gable fan is best?

And the QuietCool is the best solar-powered gable fan we've found, with a big 40 watt solar panel, brushless DC motors and a rated 1,217 CFM (cubic feet per minute) of airflow, making them effective with attics up to 2,600 square feet.

How to choose a solar powered fan?

Solar-powered fans are at their core just like any other fan, and so the main considerations are how much air they will move and how quiet and stable they are while running. The solar panel should be strong enough to run the fan motor at full power whenever there is direct sun or to charge the battery as quickly as possible.

Which solar attic fan is best?

QuietCool Solar Attic Fans are the best in the industry offering the largest panels at an affordable price. This fan features a 40-Watt solar panel, a preset thermostat, an ultra-energy efficient DC motor, a heavy-duty steel housing, and an included AC/DC inverter.
