

Montenegrin households and companies are showing great interest in installing solar panels for the production of electricity for self-consumption. So far, 14,000 homes and 800 companies have applied to the public call of power utility Elektroprivreda Crne Gore (EPCG) for the subsidized installation of photovoltaic panels, and the planned target ...

Over the period of one year Montenegro often has over 240 sunny days, thus the use of solar systems is the most ideal, most efficient and cleanest way to obtain energy. The intensity of solar radiation is among the highest in Europe, which creates ideal conditions for a serious energy transition by introducing solar thermal collectors and ...

Specifically for Montenegro, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

Montenegro's power transmission system operator CGES has so far signed six connection agreements for solar power projects. Their total peak capacity would amount to 1.64 GW in peak capacity. The investors are M Energy, Sun Horizon, Obnovljivi izvori energije, Solar Power, EE Korita and Agenos Energy
