

Is solar Pro A good GPU?

Solar Pro provides a substantial leap in performance while maintaining the best performance among single-GPU models. Key highlights include: On the IFEval benchmark, a trusted measure of instruction-following capabilities, Solar Pro outperformed all the models designed for single GPUs across all three target languages.

Does solar Pro Preview perform better on a single GPU?

Our experimental findings indicate that among models that can be deployed on a single GPU,Solar Pro Preview shows superior performancein intelligence and instruction-following capabilities,as measured by MMLU-Pro and IFEval scores respectively.

Is solar Pro Preview a good model?

Solar Pro Preview offers the perfect balance. To support this, we conducted a performance analysis comparing Solar Pro Preview with other open models with the minimum GPU memory, or VRAM, requirements in mind.

How do I access solar pro?

API from Upstage Console: If setting up your own infrastructure isn't preferable,access Solar Pro through the Upstage Console. This platform provides a user-friendly interface to interact with Solar Pro's capabilities,offering a pay-as-you-go model for flexibility.

We introduce Solar Pro Preview, an advanced large language model (LLM) with 22 billion parameters designed to fit into a single GPU. Solar Pro Preview shows superior performance compared to LLMs with less than 30 billion parameters and delivers performance comparable to models over three times its size, such as Llama 3.1 with 70 billion parameters.

Solar Pro is a highly intelligent LLM launched by Upstage, focusing on single-GPU instruction-following capabilities, with an IFEval score above 80. Currently supports English, with a formal version planned for release in November 2024, which will expand language support and context length.
