

The latest project takes EGE Haina's installed renewable energy capacity to 300 MW, generated by its wind and solar farms, the company said. ... According to the Dominican Republic's national energy commission, Girasol is the largest solar PV farm in the country and in the entire Antilles region.

The Dominican Republic's national energy commission has recently granted provisional concessions to three solar photovoltaic (PV) projects promising some 147 MWp of new capacity.

The latest project takes EGE Haina's installed renewable energy capacity to 300 MW, generated by its wind and solar farms, the company said. ... According to the Dominican Republic's national energy commission, ...

CNE, the Dominican Republic's national energy commission, has issued a definitive concession for the 110-MW/131-MWp Coastal Solar photovoltaic (PV) project to be located in the province of San Pedro de Macoris.

Part of the Support Plan for Renewable Energy Projects promoted by the Dominican government, Solar Canos is to produce enough power for 10,000 households when it is completed. Solar Canoa also follows in line with the National Development Strategy (NDT), as well as with the Agenda 2030 development goals.

2030 i i The Dominican Republic, like many island nations, is grappling with a number of challenges, such as fuel import dependence, exposure to oil price volatility and uncertain energy supplies that

LONDON -- The Dominican Republic will soon have its first large-scale solar park, the project developer has announced. German renewable energy developer Wirsol has begun construction on a 64-MW solar photovoltaic (PV) park in the Dominican province of Monte Plata, the company said.

The AES Bayasol PV park will include 145,000 solar modules with a capacity of 405Wp per panel, according to the Twitter account of the President of the Dominican Republic, Edwin de los Santos.

Dominican Republic government officials have inaugurated a 50-MW/80-MWp solar farm in the country's San Pedro de Macoris province. Named El Soco, the photovoltaic (PV) plant required more than USD 90 million (EUR 83.6m) in investments, according to a statement released by the Dominican Republic's energy commission CNE on Monday.

<p>Santo Domingo.- The energy transition involves shifting from an electricity production system based on fossil fuels--such as coal, petroleum derivatives, and natural gas--to one dominated by renewable and clean sources like water, sun, wind, and biomass. According to the "2023 Climatescope Ranking" by Bloomberg

New Energy Finance (BNEF), which ...
