

How many solar jobs are there in 2035?

The U.S. Department of Energy (DOE) expects the solar industry will need to grow from more than 330,000 employees now to between 500,000 and 1,500,000 workers by 2035 to achieve the country's decarbonization goals. According to the 2024 U.S. Energy and Employment Jobs Report, electric power generation jobs grew at double the national rate.

What jobs do solar companies need?

Solar companies need logistics specialists, marketing professionals human resources professionals, and other corporate positions to keep business operations running smoothly. These jobs span from overseeing warehouse operations to communicating externally about the business. Corporate roles can be entry-, mid-, or senior-level positions.
