

Solife Inc. is a privately held EPC company located in St. Vincent and the Grenadines. We have been in operation since 2011 and have completed 3.8 MW of solar system installations on the island, and have consulted/assessed over 40 MW of Solar systems regionally.

Later, it was found that the product that can use the sun to generate electricity is called off grid solar power system, which uses the solar heat energy to convert into electric energy, without high maintenance costs, ...

The Caribbean Development Bank has approved financing of \$8.6 million to St Vincent Electricity Services Ltd (Vinlec) for the supply and installation of solar photovoltaic (PV) systems at company buildings in the ...

Located on Union Island, the 600kW solar PV plant is connected to a 637 kilowatt-hour (kWh) lithium-ion battery, extending its generating capacity to supply all of Union Island's daytime power requirements. The project represents Masdar's first fully implemented grid-connected battery energy storage system.

The Caribbean Development Bank has approved financing of \$8.6 million to St Vincent Electricity Services Ltd (Vinlec) for the supply and installation of solar photovoltaic (PV) systems at company buildings in the vicinity of the Argyle International Airport.

Our smart solar solution is the number one home and business improvement project that pays for itself within 3-5 years, saves you money, increases the value of your property and is environmentally friendly. We help clients save thousands of dollars with our payment plans of little to no upfront cost, hassle free.

The Commissioning of the Union Island Solar PV and Battery Energy Storage System on March 25th, 2019 has been hailed as a significant milestone in the energy sector of St. Vincent and the Grenadines. Officials and stakeholders involved in the local energy sector have said this project is a game changer which is expected to bring numerous ...

Later, it was found that the product that can use the sun to generate electricity is called off grid solar power system, which uses the solar heat energy to convert into electric energy, without high maintenance costs, and is a green and quiet power generation product.
