

How much does energy cost in Anguilla?

This profile provides a snapshot of the energy landscape of Anguilla, a British overseas territory in the Caribbean. Anguilla's residential utility rates start at \$0.16 per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33/kWh.

What is Anguilla's energy mix?

Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030. Presently Anguilla's energy mix is comprised of only 4% renewable energy. Its electrical demand peaks at 16MW and its electricity prices are high relative to the rest of the Caribbean.

How many people live in Anguilla?

The population of Anguilla is 15,000 and most reside in proximity to The Valley. Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030. Presently Anguilla's energy mix is comprised of only 4% renewable energy.

Does Anguilla have energy consumption by sector?

Energy consumption by sector is unknown. The draft CCP facilitates the transition of Anguilla to an energy independent, climate resilient, energy-efficient, low-carbon economy.

Who is Anguilla Electricity Company Limited (anglec)?

Anguilla Electricity Company Limited (ANGLEC) is an investor-owned electric utility with an exclusive license to produce, transmit, and distribute electricity in Anguilla.

Where is Anguilla located?

Anguilla, a British Overseas Territory in the Eastern Caribbean, comprises a small main island and several offshore islets. The population of Anguilla is 15,000 and most reside in proximity to The Valley. Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030.

Hybrid Solar Power Residential System. EU Standard Hybrid 6KW 12KW 48V solar single phase solar power system. US Standard Hybrid 8KW 10KW 12KW 48V Split Phase 120VAC/240VAC Solar Power System. EU Standard 380-415VAC Three Phase Hybrid Solar Power System +MORE

Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030. Presently Anguilla's energy mix is comprised of only 4% renewable energy. Its electrical demand peaks at 16MW and its electricity prices are high relative to the rest of the Caribbean.

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each

of these classes and the global distribution of land area across the classes (for comparison).

The global cost of solar equipment has been dropping sharply over the last two years and is now so low as to make solar energy by far the cheapest energy available to Anguilla. Nothing comes close to this price.
