

Solartech VE 55 is suitable for use on a wide range of substrates including steel, concrete, GRP, FRP, PVC glass and wood. The product is supplied on rolls and in its uncured state is a soft, malleable, easy to use material ready for application. The material can be easily cut to any shape using knives or scissors.

Since 2014, Solartech PB series solar pumping systems were applied to ranches in Argentina to provide stable and reliable drinking water for cattle, sheep and other livestock raised by herdsmen. This kind of pumping system is driven by solar energy and does not require batteries. It is fully automatic without manual operation.

SOLARFILL is compatible with many coating systems and is highly recommended for use with all other Solartech Products when substrate repairs are necessary. The ability to offer user friendly, one component, fast curing, seamless on site applications has attracted many clients to use the SolarTech UV Curing technology.

Solartech baut Ihre effiziente Photovoltaikanlage! Solarenergie ist eine großartige Alternative für alle, die Wert auf Unabhängigkeit und Effizienz legen. Fangen Sie jetzt an, flexible und grüne Energie zu nutzen. Nehmen Sie noch heute Kontakt mit uns auf, und unsere Experten helfen Ihnen, Ihr Haus umweltfreundlich und völlig autark zu machen.

Solartech PB-G2 Series Solar Pumping Inverter controls and regulates the operation of solar pumping system. It drives the pump by converting DC power produced by solar array into AC power and adjusts the output frequency according to solar radiation in real time to implement maximum power point tracking (MPPT).
