

The project developed solar resource and projected solar generation potential documentation to support a vision and road-map for the development of Montenegro's solar resources. Green Power Labs quantified and mapped the country's solar resources and areas of interest for the development of solar farms

At Solar Montenegro Clarion Partners, with our solar and energy storage specialist, we offer a wide range of solar services for solar power plants such as solar design engineering, solar consulting, QA/QC on solar panels and other ...

The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource ...

We take great pride in presenting the first solar power plant on land in Montenegro. Our company was founded in 2021 with a mission to produce green energy. Additionally, we are engaged in improving the energy efficiency of buildings to assist our clients in reducing their energy consumption and costs.

ZEUS Energy has established a Brand New State of the Art, 500Sqm Research & Development facility in Kotor, Montenegro. The facility is dedicated to the development and testing of Green Energy technology, specifically vertical axis wind turbines able to capture "The Power of Nature" and produce sustainable green energy.

The Project site is located in central region of Montenegro in the area of Chevo which lies on the border between Cetinje and Niksic municipalities, 68km away from Podgorica and 101km away from the Port of Bar. The project site covers the total area of 1300 ha (13,000,000 sqm) owned by "M Energy" doo.
