

Is Cuba wasting solar energy?

The opportunity now for individuals to import their own photovoltaic systems to Cuba, may change this situation. With just 20,000 solar water heaters and a million kWh every day of energy installed in its photovoltaic parks, Cuba is basically wasting the vast majority of the solar energy it has available. Read more from Cuba here on Havana Times.

Should Cuba have a photovoltaic system?

The first of these two proposals seems to be the most attractive for Cubans with the means to do so. With today's photovoltaic technologies, any Cuban house can in theory satisfy its own electricity needs, as well as that of neighboring residences.

How much energy does Cuba use per month?

By the end of 2020, the average consumption of private clients in Cuba was 185 kilowatts/hour(kWh) per month: just over 2200 kWh per year. Practically the amount of energy that reaches any geographic location in Cuba in the form of solar irradiance in a year (around 1825 kWh per cubic meter).
