Salary estimates based on salary survey data collected directly from employers and anonymous employees in Spain. Menu. For Employers For Employers. For Employers. Check out the Assessor platform and get access to our salary data for ...

Following the Spanish government's move a couple of years ago to crack down on households generating their own solar power, switching to the renewable energy has generally been seen as not being viable for the average individual. The infamous royal decree 900/2015, which came into effect in October 2015, effectively raised the costs of running your own solar setup.
