

Will French Guiana reach 85% renewables by 2023?

French energy minister Ségolène Royal has signed a decree establishing an energy programme (PPE) for French Guiana, that aims to use solar, biomass and hydro to reach 85% renewables generation by 2023. The PPE for the region in South America was co-developed between France and the territorial community of French Guiana.

What is PVGIS & how does it work?

PVGIS provides information on solar radiation and photovoltaic system performance for any location in the world, except the North and South Poles. How much electricity could photovoltaics produce where I live? How does production change over the year? How much does a battery help to use all the electricity produced?

What is non-renewable hydro & marine solar IOE RGY Tal Arab Emirates?

Other Non-RE Renewable Hydro and marine Solar ioe rgy G rm tal Arab Emirates no fossil fuel generation occurs, an average fossil fuel emission factor has been used to calculate the avoided emissions. These profiles have been produced to provide an overview of developments in renewable energy in d
