Located on the coast of Kenya, the 52 MWp Malindi Solar plant is one of the largest utility solar farms in East Africa. The plant has been generating clean electricity since mid-December 2021 and selling it to national utility Kenya ...

The 52MWp Malindi Solar Plant in Kenya is exporting 40MWac of power into the national grid since 14 December 2021. The power plant is delivering enough clean and renewable power to supply approximately 250,000 residential customers and will avoid 44,500 tons of CO2-equivalent emissions annually.

Made up of 157,000 photovoltaic panels, it is one of the first IPP owned utility scale solar plants in Kenya and the only renewable power plant located in the Coastal area. The US\$69 million solar plant is located in Langobaya, Malindi District, Kilifi County, about 120 kms north-east of Mombasa and started construction in 2019.

Made up of 157,000 photovoltaic panels, it is one of the first IPP owned utility scale solar plants in Kenya and the only renewable power plant located in the Coastal area. The US\$69 million solar plant is located in Langobaya, Malindi ...

The power generated from the project is sold to Kenya Power and Lighting under a power purchase agreement for a period of 20 years. The contracted capacity is 40MW. Contractors involved Sterling and Wilson Renewable Energy was selected to render engineering procurement construction services for the solar PV power project.

Un financement participatif d'avenir ! A l'heure de la transition écologique, les nouveaux modes de transports sont ; l'honneur, le marché est colossal. A étudier rapidement.

The project will be led by Malindi Solar Group, a company created ad hoc by Globeleq. The latter, 70% owned by CDC and 30% by Nordfund, will build a 52 MWp solar park in Malindi, a coastal town in southeastern Kenya. The energy produced will be consumed by locals as the region is still facing load shedding.
