

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

Are Solis hybrid inverters compatible with lithium batteries?

Solis Battery Compatibility list To ensure optimal efficiency of your solar system, Solis hybrid inverters have been tested for compatibility with a wide range of Lithium batteries. More battery manufacturers will be added to our compatibility list in the future. When designing your installation, we recommend checking the compatibility list.

Where can I find a Solis battery storage system?

Call 0800 246 1690 The Solis Battery Storage system is here. From the market leader in inverter technology. A brand you can trust with 1st class UK customer service. The Solis battery storage system has been designed by a world leading research and development team comprising of professors and specialists from 8 countries.
