

How many households are connected to the electrical grid in Solomon Islands?

In Solomon Islands, only 16% of households are connected to the electrical grid. The low level of electrification in Solomon Islands is due to systemic, economic, and geographic barriers to expanding the grid.

Will Solomon Islands stand in the way of the Korea - Pacific Forum Declaration?

Solomon Islands will not stand in the way of the adoption of the Korea - Pacific Forum Summit Declaration but sadly cannot align with it. "We shall not be forced to take sides and participate in power politics. Solomon Islands as a country must and will always abide by its policy of friends to all and enemy to none.

How many electricians live in Solomon Islands?

Further complicating matters, in 2016 only 60 licensed electricians lived in the country and all resided in the capital, Honiara. While the World Bank has invested significantly in sustainable energy programs in Solomon Islands, particularly in hydropower and clean energy access, many challenges still remain.

What is the relationship between Korea and Solomon Islands?

Solomon Islands bilateral relations with the Republic of Korea remains warm and cordial.

Why is there a low level of electrification in Solomon Islands?

The low level of electrification in Solomon Islands is due to systemic, economic, and geographic barriers to expanding the grid. A low population density and urbanization rate, combined with geographic remoteness and the logistical challenges of expanding grid infrastructure in an island country, result in high costs for initial development.

Does the RBF approach fit the challenge of electrifying Solomon Islands?

The RBF approach for energy access fits the challenge of electrifying Solomon Islands for several reasons. Initial high upfront costs created significant affordability challenges for people in Solomon Islands. Based on an initial World Bank assessment, the willingness to pay for electricity was quite evident.

By tying disbursement of funds to actual results, local partners are both incentivized to meet specific goals and given flexibility on how to meet them. Starting in 2016, GPRBA partnered with Solomon Islands' state-owned power utility, Solomon Power, to increase access to reliable electricity through an RBF project.
