

Who is solshare?

SOLshare is a climate-tech company, founded in 2014~2015, consisting of a team of tech pioneers fully based out of Dhaka. Our globally recognized SOLbazaar has developed into an energy marketplace to fight access deficits to sustainable energy services.

How has solshare evolved?

SOLshare has thus grown from an energy access company to an energy service provider, from a household energy challenge to a mobility energy challenge. Throughout this endeavor we have been maintaining an asset-light approach, focusing on a smart energy technology that empowers existing players to provide better services to our customers.

What makes solshare different from other business lines?

Each business line lends each other synergy effects from a strong IoT backbone, integration from mobile financial services, and secure authentication. SOLshare has thus grown from an energy access company to an energy service provider, from a household energy challenge to a mobility energy challenge.

What is solshare & why is it important?

In 2015 SOLshare established the world's first peer-to-peer solar energy grid in a remote community in Bangladesh. As well as the undoubted impact it had on households in parts of the country underserved by traditional utilities, it represented a significant step forward in the move towards a decentralized and democratized energy system.

How does solshare work?

SolShare takes the power generated from a single rooftop PV array and directs it to multiple flats within the same building. This behind-the-meter solution makes solar for flats possible. By connecting behind-the-meter, it delivers energy directly to each household.

Who is creators solshare?

Dreamers. Innovators. Creators SOLshare is a leading climate-tech company located in the heart of Bangladesh. Founded in 2014-2015, we provide cutting-edge technology and services and offer scalable solutions through our globally recognized service platform - the SOLbazaar.

J.1. SOLSHARE OUTPUT -> SOLSHARE MAINTENANCE CIRCUIT BREAKER All cables from the SolShare to the SolShare Maintenance Circuit Breakers must be the same thermal capacity as the input cabling between the inverter and the SolShare input. This is because at points in time the SolShare may direct all current to one unit on each phase.

SOLshare has developed the world's first solar peer-to-peer energy exchange platform, in remote areas of

Bangladesh and India, where the national grid has not reached yet - so called off-grid areas. Bangladesh is ...

Rooftop solar: Photovoltaic system that has its electricity-generating solar panels which are mounted on the rooftop on various infrastructures. OPEX model: A dedicated energy service company (ESCO) builds, owns and operates a solar ... SOLshare delivers services to this ESCO and may opt to be a co-shareholder. CAPEX model: The C& I owns the ...

Increase SAP points & EPC branding with SolShare, the world's only technology for connecting multiple flats to a single rooftop solar system. ... The SolShare system seems to be a much fairer solution as the energy generated by the building can be shared equally to help our residents to keep their electricity costs down rather than going back ...

However, at present the knowledge of the impact and how to avoid harmful effects related to weather and extreme climatic events are sparse, particularly, in rural Africa. This article studies the association between weather and daily mortality in the Nouna Health and Demographic Surveillance System (HDSS) area in Burkina Faso.

Swapping lead-acid batteries with lithium-ion batteries can make a huge difference to the daily incomes of EV drivers, garage owners, and in the long term, the environment. At SOLshare, we are driving the change towards a better financial future for the electric three-wheeler community while ensuring the environment around us does not suffer.

Burkina Faso's legal system falls into the broad Civil Law family. The reason is its colonial encounter with France, the former colonial power. However, like other African countries, Burkina Faso's legal system can best be described as pluralistic. Although this fact is often ignored in studies, there is a considerable presence of customary ...

SOLSHARE IS A CLIMATE-TECH COMPANY CREATING A GLOBAL NETWORK OF SMART DISTRIBUTED SOLAR PV AND STORAGE ASSETS ... SOLroof: Commercial and Industrial solar rooftop installation projects by SOLshare Rooftop solar: Photovoltaic system that has its electricity-generating solar panels which are mounted on the rooftop on various infrastructures.

Information on how to design a SolShare system can be found by requesting Allume's SolShare System & SLD Design Rules document. Learn More. A title. Image Box text. General Specifications; Parameter Value; Dimensions: 920*485*270mm(H*W*D) Weight: 38kg: Max Number of connections per unit:

SolShare is a hardware and software solution that physically splits the energy from a rooftop solar system and divides it between multiple dwellings. Watch Video. ... This is achieved by creating the ability for a single solar energy system on site to provide power to up to ten participating tenants, rather than relying on multiple systems. ...

Present-day Burkina Faso was dominated by the powerful Mossi kingdoms prior to French colonization in the 19th century. It obtained independence (as Upper Volta) in 1960 and was renamed in 1984. Blaise Compaoré took power in a 1987 coup and ruled Burkina Faso until his downfall in 2014. While his authoritarian rule was associated with relative stability in the ...

about solshare a climate tech organization solshare is a climate-tech company creating a global network of smart distributed solar pv and storage assets at the nexus of energy and transport to increase renewables to the grid while putting more money into the pockets of five million electric three-wheeler drivers in bangladesh today.
