

Who is south 8 technologies?

South 8 Technologies began operations in 2016 as a spin out of UC San Diego where the founding team developed its breakthrough new Liquefied Gas Electrolyte (LiGas™) chemistry for next-generation lithium batteries. Its patented technology enables a substantial increase in energy, improved safety, and an exceptionally wide operating temperature.

What is south 8 technologies e-mobility?

South 8 Technologies is expanding e-mobility into even the harshest environments. LiGas has achieved world-record temperature performance in low- and high-temperature environments from -60 to +60 °C. The LiGas electrolyte is giga-factory compatible with most of today's manufacturing processes and equipment.

What is south 8's Ligas electrolyte technology?

South 8's LiGas electrolyte technology offers a unique approach to next-generation lithium batteries and addresses the shortcomings of existing liquid electrolytes and solid-state batteries that are still under development.

In this interview, Tom Stepien, CEO of South 8 Technologies, discusses how the company's innovative LiGas™ technology is advancing safer lithium-ion battery solutions and addressing challenges across defense, EV, and industrial applications.

SAN DIEGO - South 8 Technologies, Inc., the San Diego cleantech company innovating safer and higher performance electrolytes for the next generation of lithium-ion batteries, has closed a strategic investment with Lockheed Martin Ventures, the venture arm of Lockheed Martin (NYSE:LMT), a global leader in defense and aerospace technology, with ...

SAN DIEGO - South 8 Technologies, Inc., the San Diego cleantech company innovating safer and higher performance electrolytes for the next generation of lithium-ion batteries, recently expanded its manufacturing facility, corporate offices and team of experts as interest grows in its patented liquified gas electrolyte, LiGas™. "This expansion allows us to ...

South 8 solves lithium-ion's "fire and ice"(TM) problems with LiGas™, a patented liquefied gas electrolyte. LiGas reduces lithium-ion fire risk and operates from -60°C to +60°C, ...

South 8 Technologies | LinkedIn ??? 5,437? | Delivering breakthrough energy storage solutions to advance a clean energy future. | South 8 Technologies, Inc. develops, manufactures and licenses LiGas™, the liquefied gas electrolyte for advanced lithium-ion batteries that solves lithium-ion's "fire and ice(TM)" problems. South 8's patented LiGas electrolyte reduces fire risk ...

About South 8 Technologies. South 8 solves lithium-ion's "fire and ice"(TM) problems with LiGas[®], a patented liquefied gas electrolyte. LiGas reduces lithium-ion fire risk and operates from ...

CHICAGO - NanoGraf, an advanced battery materials company and enabler of the world's most energy-dense lithium-ion cylindrical battery cell, and South 8 Technologies, developers of a novel liquefied gas electrolyte for ...

SAN DIEGO - South 8 Technologies, Inc. is thrilled to announce the closing of strategic investments from Shell Ventures and Taiyo Nippon Sanso Corporation (TNSC). This funding follows that of Shell's early-stage GameChanger program and several federal and state sponsored grant and contract opportunities that have helped mature South 8's breakthrough ...

Historiquement, Madagascar a démontré une capacité à adopter et s'adapter aux nouvelles technologies. Avec une population jeune et de plus en plus connectée, le pays a le potentiel ...

Based on a recommendation from the TNA, agroforestry has been incorporated into Madagascar's agriculture development plans and policies. These plans indicate that by 2025 the goal is to install ten agroforestry pilot sites in areas ...

SAN DIEGO, February 21, 2024--South 8 Technologies ("South 8"), the developer of LiGas[®], liquefied gas electrolyte for advanced lithium-ion batteries, has demonstrated high ...

South 8 Technologies, Inc. develops, manufactures and licenses LiGas[®], the liquefied gas electrolyte for advanced lithium-ion batteries that solves lithium-ion's "fire and ice(TM)" problems. South 8's patented LiGas electrolyte reduces fire ...

South 8 Technologies will develop high-power lithium-ion battery cells with the capacity to charge rapidly using a novel liquefied gas (LiGas) electrolyte technology. The LiGas electrolyte uses non-toxic and non-corrosive gases, which are already domestically manufactured and widely available, that are liquefied under moderate pressures and can be contained in ...

South 8 will be exhibiting in booth #615 at the upcoming Advanced Automotive Battery Conference (AABC) to be held in San Diego, December 11-14, 2023. About South 8 Technologies. South 8 solves lithium ...
