

Who is AMIC mining?

AMIC is an industry-leading innovator in alternative mining solutions and rehabilitation. Both the founder, Kenny Masobe and the COO, Tshego Motsoenyane, are thought leaders in best practice alternative mining solutions.

What are South Africa's minimum energy performance standards?

South Africa's ambitious mandatory Minimum Energy Performance Standards for lighting, promoting the use of energy-efficient LED lamps, were established with key support from the UN Environment Programme.

Who owns South Africa's coal power?

Eskom, the main national energy generator, owns and operates most of South Africa's 40 GW coal power fleet, while Sasol is an energy and chemical company active in coal-to-liquids and chemicals. Coal mining has been a key sector for post-apartheid economic redistribution, connecting political elites to mining interests.

Why does South Africa need a new energy policy?

Especially, due to South Africa's high unemployment rate of over 40 % and the likelihood of employees in coal-related sectors not finding alternatives in the energy sector. It is essential that interventions target the challenge on municipal, provincial and national levels (World Bank, 2019; Wright & Calitz, 2020b).

How much electricity does Eskom produce in South Africa?

Eskom, the vertically integrated, state-owned power company, generates approximately 95 percent of electricity used in South Africa, as well as a substantial share of the electricity generated on the African continent. The utility ranks in the top 20 utilities worldwide by generation capacity and is the biggest producer of power in Africa.

Why is electricity important in South Africa?

It powers education, healthcare, food security, industrialization, economic opportunities, and a better quality of life. Despite the post-1994 energy access progress, millions in South Africa's townships, informal settlements, and rural areas still live without affordable and reliable electricity.

South Africa's renewable energy imports reach R17 billion in 2024. Deputy Minister of Energy and Electricity Samantha Graham-Marsh; announced the figure Friday, Nov. 8, as part of the government's push to expand the renewable energy sector, create local jobs and stimulate economic growth.
