

centred around Nigeria, Angola, Equatorial Guinea and Cameroon (chart below). Between them, these four countries exported 28.3 million tonnes (mt) of LNG, representing 8.9% of the global traded market. Other countries including Mozambique will shortly be joining this club of exporters and Stirling LNG expects the entire region to further

Thermal power plants generate electricity by harnessing the heat of burning fuels or nuclear reactions - during which up to half of their energy content is lost. Renewable power sources generate electricity directly from natural forces such as the sun, wind, or the movement of water.

Equatorial Guinea: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

B& W's Towerpak® boiler is a version of our Stirling® power boiler designed for the lower capacities often required by industrial plants. It incorporates many of the design and manufacturing technology features of the Stirling boiler, including ...

ECP, in partnership with the Ministry of Mines and Hydrocarbons, announced the launch of its Africa Energy Series: Equatorial Guinea 2021 campaign - comprising a report and documentary - that will serve as a critical tool to navigate the energy investment landscape of one of Africa's more mature petroleum-producing markets.

B& W's Towerpak® boiler is a version of our Stirling® power boiler designed for the lower capacities often required by industrial plants. It incorporates many of the design and manufacturing technology features of the Stirling boiler, including furnace construction details, convection surface design and circulation enhancements.

For successful commercial dissemination of Stirling-engine CHP, it is essential to improve the on-site electrical efficiency, reduce the capital cost of systems, and develop renewable-energy-powered and free-piston Stirling-engine-based CHP systems against the background of grid decarbonization and carbon neutrality.

B& W's Stirling® boiler has provided dependable steam to industry for more than 100 years. Since 1960 B& W has sold more than 240 Stirling power boilers that are providing more than 75 million lb/h steam flow, burning a wide variety of ...

B& W's Stirling® boiler has provided dependable steam to industry for more than 100 years. Since 1960

B& W has sold more than 240 Stirling power boilers that are providing more than 75 million lb/h steam flow, burning a wide variety of fuels.
