

Robot String Layup A robot string layup adopts leading machine vision technology and intelligent algorithms to rapidly and accurately identify the solar panel's size and other information. ...

Auto Trimming Machine The trimming machine can adapt to different sizes and shapes of panels and has a series of merits like high trimming quality, precision and speed, low noise and easy ...

ConfirmWare Tabber & Stringer - Born For Higher Output. The most critical figure in the entire production line -- tabber and stringer machines attaches and solders ribbons on the photovoltaic cells IBC, MBB, and various busbars, ensuring ...

The soldering effect, such as cell spacing, cell numbers of single string, soldering temperatures and etc, can be adjusted according to requirements. SS-2500B can be integrated with automatic layup machine to achieve the composing and ...

Turnkey lines for PV module manufacturing. 50 MW LINE; 100 MW LINE; 150 MW LINE; 300 MW LINE; 600 MW LINE; 1200 MW LINE; ... Our combined Tabber & Stringer machines are accurate, reliable and easy to operate. Our ...

MBB cell stringer machine of MS40K is an automatic machine used for serial connection between crystalline silicon solar cells. The soldering machine can be applied to 3BB~12BB solar cells of ...

An automatic J-box soldering machine is an efficient machine used for rapid and accurate soldering of PV junction boxes. Featuring higher precision and stability, the soldering machine ...

An automatic bussing machine adopts induction welding and can be applied to 5BB-12BB solar cells of 156-210mm. ... to providing complete PV module manufacturing solutions for global customers within the photovoltaic industry ...

MS40K/MS100B Tabber and Stringer Machine is a fully automatic machine, which can be used with different types of silicon solar cells, monocrystalline or polycrystalline, and solder them into a string. - We provide ...

how to organize the solar panel production equipment Setting a production line of solar panels is a task that requires know-how and experience. The variables are different, so it's better to organize the space according to a ...

Solar cell stringer machines are efficient and automatic soldering equipment for serial connection of solar cells

into strings. The machine applies infrared soldering and automatic cutting to different solar strings.

The soldering effect, such as cell spacing, cell numbers of single string, soldering temperatures and etc, can be adjusted according to requirements. SS-2500B can be integrated with ...
