

What is evyon battery energy storage?

Evyon provides a modular DC battery energy storage solution based on repurposed EV batteries for system integrators to integrate into a range of solutions. Scalable to fit your needs. Online-connected to maximize safety, performance, and longevity.

What is evyon EV battery?

Evyon leverages a data-driven approach to repurpose discarded EV batteries into high-quality, sustainable and scalable battery systems. Evyon is an electrical company that provides EV battery solutions to accelerate into a fully renewable future for everyone.

Does evyon use repurposed EV batteries?

Sustainability Evyon uses only repurposed EV battery modules, which reduces the carbon footprint by up to 85% compared to new systems. Quality Evyon Industrial uses brand-new, Tier 1 EV battery modules from a leading German car manufacturer and a BMS based on 15 years of experience.

Who makes evyon industrial batteries?

Evyon Industrial is built using batteries from a leading German car manufacturer to ensure our systems are of the highest quality and safety in the industry. In addition to the battery cells themselves, Evyon uses a well-proven BMS from a manufacturer with more than 15 years of experience.

Does evyon have a battery cloud?

Evyon's solution includes a "Battery Cloud", an online platform where users can monitor their own battery system. This gives real-time and historical insight about the system, such as voltage and current. "Using our Battery Cloud, users can be sure that the batteries are safe and reliable for their entire lifespan," says Erdal.

What does evyon do?

Evyon exists to maximize the value of every battery for a fully renewable future for everyone. This we do by combining cutting-edge battery intelligence with the industrialization of repurposing, making repurposed battery systems both financially and environmentally sustainable.

The second life market looks set to boom in the coming years as EV uptake grows. But it is still taking shape so it will be fascinating to see what roles OEMs, battery recycling firms and system integrators carve out for ...

This is because Evyon repurposes EV batteries from Mercedes-Benz and reuses them in industrial battery systems, creating a scalable and planet-friendly energy storage solution. Customers can also benefit from quick ...

This is because Evyon repurposes EV batteries from Mercedes-Benz and reuses them in industrial battery

systems, creating a scalable and planet-friendly energy storage solution. Customers can also benefit from quick delivery and a 10 year warranty.

Evyon repurposes second-life EV batteries into green battery systems for residential and commercial use. The battery systems can be used for a wide range of stationary storage applications, from peak shaving to storage of solar cell energy for self-consumption.

Evyon exists to maximize the value of every battery for a fully renewable future for everyone. This we do by combining cutting-edge battery intelligence with the industrialization of repurposing, making repurposed battery systems both ...

Evyon is dedicated to maximizing the value of every battery to foster a fully renewable future. By harnessing advanced battery intelligence and industrial practices, the company repurposes EV batteries in a cost-effective, safe, and streamlined manner.

Evyon maximizes the value of second-life EV batteries by repurposing them into high-quality energy storage systems in a streamlined, safe, and cost-effective way. We develop novel technologies for reassembly and operations to convert usable second-life EV batteries into modular plug-and-play battery storage systems.

The second life market looks set to boom in the coming years as EV uptake grows. But it is still taking shape so it will be fascinating to see what roles OEMs, battery recycling firms and system integrators carve out for themselves in the space.

Evyon repurposes second-life EV batteries into green battery systems for residential and commercial use. The battery systems can be used for a wide range of stationary storage applications, from peak shaving to storage ...

Evyon provides a modular DC battery energy storage solution based on repurposed EV batteries for system integrators to integrate into a range of solutions. Scalable to fit your needs. Online-connected to maximize safety, performance, and longevity.

Evyon exists to enable maximum value generation from second-life batteries by repurposing them in a safe, data-driven and cost-effective way. Evyon's proprietary hardware and Battery Cloud ecosystem enable the conversion of EV batteries into high-quality, affordable, and plug-and-play battery energy storage systems.

Evyon exists to maximize the value of every battery for a fully renewable future for everyone. This we do by combining cutting-edge battery intelligence with the industrialization of repurposing, making repurposed battery systems both financially and environmentally sustainable.
