Attach the panels at the top of every other corrugation using a WoodTite® fastener with a bonded EPDM washer. Fit the washer tight against the surface of the panel. If the panel starts to deform downward, that is too tight. STEP 6: Apply the approved silicone sealant where the second SUNTUF® Polycarbonate panel will overlap the first.

A flat roof is considered ideal for solar panel installation as it makes it easy to have panels installed at the best angle where they can receive maximum sun exposure when paired with tilt frames. These are frames tilted at an angle that captures the most sunshine.

At present, no such regulation has been established in the Slovak Republic. At the moment, it is up to everyone to consider whether they are interested in increasing the energy efficiency of their project.
