

Pope Francis has unveiled a plan to transition Vatican City to solar energy as its primary source of electricity in his latest motu proprio "Fratello Sole" or "Brother Sun." The Holy Father has directed the construction of an agrivoltaic system on Vatican-owned land in Santa Maria di Galeria, located just outside Rome.

Pope Francis recently published a motu proprio entitled "Brother Sun", an official document which outlines the Holy See's plans to transition to 100% solar energy. This move is part of a broader commitment by the Catholic Church towards climate change.

Pope Francis has announced plans for the Vatican City to go solar through his latest motu proprio, Fratello Sole, or Brother Sun. The pope has delegated Vatican governing bodies to work with the Italian government to ...

Pope Francis has unveiled plans for a solar plant that will let the Vatican City generate all its electricity from renewable sources. With an area of 121 acres or 0.44km² and a population of around 825, the Vatican City in ...

Pope Francis has unveiled a plan to transition Vatican City to solar energy as its primary source of electricity in his latest motu proprio "Fratello Sole" or "Brother Sun." The Holy Father has directed the construction of an ...

Pope Francis has announced measures to transition Vatican City to using solar energy as its main source of electricity, as outlined in his latest motu proprio titled Fratello Sole, or "Brother Sun."

Pope Francis has announced plans for the Vatican City to go solar through his latest motu proprio, Fratello Sole, or Brother Sun. The pope has delegated Vatican governing bodies to work with the Italian government to build an agrivoltaics system in the lands of Santa Maria di Galeria, located outside of Rome and an extra-territory of Vatican City.

Pope Francis has unveiled plans for a solar plant that will let the Vatican City generate all its electricity from renewable sources. With an area of 121 acres or 0.44km² and ...

Though it is estimated that the panels cost around \$1.5 million, they were donated to the Vatican through a partnership with German company SolarWorld. In total the array will generate about 100 megawatts, enough energy for 40,000 households, way more than the ...

Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside Rome.

Pope Francis appointed two special commissioners to start work on building an agrivoltaic system on a Vatican property outside of Rome that could supply the whole of Vatican City's energy...

Providing energy for Vatican City State. The agrivoltaic plant will make use of the Holy See's property at Santa Maria di Galeria. Located on the edge of Rome, the 424-hectare site houses the transmission facilities for Vatican Radio, thanks to a 1951 agreement between the Holy See and the Italian State.

Pope Francis has unveiled plans for a solar plant that will let the Vatican City generate all its electricity from renewable sources. With an area of 121 acres or 0.44km² and a population of around 825, the Vatican City in Rome is the smallest independent state in the world by both area and population.

Though it is estimated that the panels cost around \$1.5 million, they were donated to the Vatican through a partnership with German company SolarWorld. In total the array will generate about 100 megawatts, enough energy for 40,000 ...
