

Who can benefit from a new off-grid solar scheme in Benin?

Households, smallholders and entrepreneurs in remote locations across Benin will be able to access reliable and cheap electricity for the first time under a new off-grid solar scheme agreed between leading solar energy company ENGIE Energy Access and the European Investment Bank, one of the world's largest financiers of renewable energy.

What is Suncore's solar charging technology?

SunCore's solar charging technology can take your products to the next level, giving you a leg up on the competition, and your customers an incredible new experience; Solar that works! Our technology will keep your products charging and powered up using light from direct sun as well as indirect sun and under a cloud cover.

How does Suncore work?

SunCore's technology captures both solar light and indoor incandescent light, and uses it to charge your devices. The energy collected from these light sources is then used to charge your electronic devices. Because our charging products use light to charge your device, there's no need for wall plugs to keep a full charge!

Will EIB support Engie to deploy off-grid solar power in Benin?

The new Benin cooperation follows EIB's previous support for ENGIE to deploy off-grid solar power in Uganda. Benin is the sixth African country to benefit from the EIB's streamlined support for African off-grid energy investment, following recent backing for projects in Mozambique, Uganda, Chad, the Democratic Republic of Congo and the Comoros.
