

Does North Korea still use solar power?

In this installment of our series on North Korea's energy sector, we move away from official and commercial uses of solar and seek to understand the growing use of solar power for personal energy consumption in a country where its people still suffer from an unreliable power supply nationwide.

Why does North Korea need a solar power supply?

An insufficient and unstable power supply is one of the critical challenges North Korea struggles to address. While solar energy has provided one way for citizens to better cope with this reality, it is incapable of supplying enough power to satisfy everyday operations and needs.

Where is solar installed in North Korea?

Today, solar can be found on some of North Korea's most important or high-profile civilian factories, outlined below. The factories were chosen for the size of the installation and their notability, usually though consistent mentions in state media reporting.

Do solar panels work in Pyongyang?

Even in Pyongyang, solar panels appear to be commonplace on buildings and dwellings to supplement electricity shortcomings. Such panels can be seen on satellite imagery because they tend to be larger.

Where are solar water heaters located in Pyongyang?

Large solar water heaters on top of an apartment building and smaller individual solar electricity panels on the balconies of the same building at the Jangchon Vegetable Cooperative Farm in Pyongyang, as seen on KCTV on April 13, 2022. (Source: Korean Central Television)

Are North Korea's solar panels from China?

Two defectors from Hyesan who left North Korea in 2019 suggested most of the solar panels in the city were from China, consistent with reports from around the same time. In some cases, small solar-powered devices might also be used.

North Korea operates a two-tier power grid where factories get preferential access to the country's limited electricity resources. Given the need for continuous operation, most factory production likely operates on grid power. However, large solar power installations can be found on several of North Korea's major manufacturing plants as well.
