

Is solar energy available in Serbia?

“Demand is currently three times higher than supply,” says Miroslav Micic from Top Solar, a Serbia-based solar technology company. The independent Belgrade-based Environment Improvement Center estimates that the potential of solar energy in Serbia is 30% higher than in Central Europe.

How many people can afford to invest in solar power in Serbia?

In Serbia, however, says energy efficiency expert Slobodan Jerotic, the question is really how many households can afford to invest EUR5,000-6,000 in solar power systems. “We are talking at best about 10,000 families, and that would be around 30 megawatts in total, which is not a huge amount,” he says.

Who makes SunPower solar panels?

SunPower, founded in 1985, is a solar panel manufacturer based in Richmond. On this page, you can find a complete list of solar panels from SunPower and compare models side-by-side. Quick facts about SunPower solar panels in the EnergySage Buyer's Guide: Are SunPower solar panels best for you? How to choose the right solar panels for your needs

How much do solar panels cost?

When using SunPower panels, you can expect to pay around \$3.35 per watt, according to system pricing data gathered by EnergySage. However, you will get the most efficient solar panels in the industry for that extra investment: SunPower reaches 22.8% efficiency, followed by LG (22.3%) and REC (21.9%).

Does SunPower have a warranty?

SunPower also offers better warranty conditions when you purchase a complete solar power system. In case you're planning a roof replacement, SunPower has a roofing system called OneRoof, which is designed for easy integration with their solar panels. Their OneRoof system is UL certified and it has a Class A fire rating.

Is SunPower a good solar brand?

To summarize, SunPower is a premium brand that focuses on high efficiency and long-term warranty coverage. As you might expect, these benefits come with a higher price tag: while many solar brands have installed costs below \$3 per watt, SunPower has an average cost of \$3.35 per watt according to EnergySage data.
