

Sustainable Energy - Clean Energy Program. Energy Efficiency (Natural Gas Incentives Now Available), Solar PV, & Solar Water Heater Grants The Clean Energy Program builds on Maryland and Prince George's County's energy-efficiency and carbon reduction goals. It will help make our County more energy resilient by using a holistic approach to break ...

The Master of Engineering Program in Sustainable and Renewable Energy builds on the success of KFUPM's undergraduate education with its emphasis on research and study of advanced and specialized subjects. The general objective of the program is to prepare professionals and leaders with the skills required to address the challenges of ...

renewable energy and requests a strategy for deployment of renewable energy resources, development of sustainable energy roadmaps, and access to increased capital flows for sustainable energy projects. We emphasise that renewable energy is one of the key means for mitigating climate change and strengthening resilience against its impact.

We, the participants of the Martinique Conference on Island Energy Transitions, have met in Martinique on 22-24 June 2015 to advance the goal of unlocking and mobilizing the human, financial and technical and natural resources that are ...

La transition &#233;nerg&#233;tique est un mouvement dans lequel la Martinique est d&#233;sormais r&#233;solument engag&#233;e. Port&#233;e par la lutte contre le r&#233;chauffement climatique et de la n&#233;cessit&#233; d'agir, elle ...

About the MA in Sustainable Energy (online) Program at Johns Hopkins SAIS. Created by Johns Hopkins University School of Advanced International Studies faculty with input from industry experts and employers, the Master of Arts in Sustainable Energy (online) program is tailored for the demands of a rapidly evolving sector. As a top global university, Johns Hopkins ...

Sustainability is the key driver of our future development, especially when it comes to energy utilization and consumption. As natural resources are becoming increasingly scarce or more expensive, the sustainable use of energy is becoming more and more important. This degree program combines education in energy systems with regard to sustainable energy resources ...

Because the global energy system is a complex, sociotechnical system, the transition toward sustainable energy requires the next generation of leaders to possess a transdisciplinary perspective comprising both technical and societal dimensions of energy. The PhD program in sustainable energy integrates these perspectives in preparing students ...
