

Belgium Volt leads the charge in on-demand smart energy solutions, seamlessly integrating cutting-edge technologies for efficient energy management. Our innovative approach empowers users with dynamic control, adapting to their needs and contributing to ...

Eneco is investing in a major battery energy storage project in Wallonia. With the installation of a 50 MW/200 MWh of battery energy storage, sustainably generated electricity can be used more efficiently to balance Belgium's electricity grid. The permit has been obtained, the battery ordered and preparatory study works are underway to have the ...

Sweco plans and designs the sustainable communities and cities of the future. Together with our clients and the collective knowledge of our 22,000 architects, engineers and other experts, we co-create solutions to address urbanisation, capture the power of digitalisation, and make our societies more sustainable.

The astonishing solution delivered by Iskraemeco brings new Energy IoT technologies to Belgium's grid operator Arewal in order to facilitate sustainable and smart transitions of its electricity network. Iskraemeco combines select components of its cutting-edge solution providing smart meters based on NB-IoT communication and a HES and MDM software platform.

Discover our research projects that help accelerate the energy transition and aim towards a more sustainable future. We work with partners across sectors to develop breakthrough solutions in power generation, energy grids, energy efficiency and more.

Sustainable energy provider ENGIE in Belgium turned to ABB Electrification for a retrofit switchgear upgrade to future-proof, safeguard and extend the safe operating life of its electrical infrastructure across five of its combined heat and power (CHP) plants.

Eneco is investing in a major battery energy storage project in Wallonia. With the installation of a 50 MW/200 MWh of battery energy storage, sustainably generated electricity can be used more efficiently to balance Belgium's ...

As an innovative producer of green electricity in Belgium, ENGIE has high ambitions in the field of renewable energy. By 2030, we intend to develop 1,000 MW of onshore wind power. We also help our private customers, companies and local authorities to make the transition to a zero-carbon future in a simple and cost-effective way through the ...

As Belgium addresses the challenge of fluctuating energy supply from sun and wind, innovative solutions gain prominence. Energy storage options such as thermal storage and "power-to-gas" conversion, where electricity

is transformed into hydrogen, offer potential avenues to balance supply and demand across heat, fuels, and electricity.

Discover our research projects that help accelerate the energy transition and aim towards a more sustainable future. We work with partners across sectors to develop breakthrough solutions in power generation, energy ...

Energy Solutions Group manages more than 350 renewable energy production sites and invests internationally in solar farms, wind turbines, energy storage and fast-charging stations for electric vehicles, striving for an emission-free economy.
