your chosen country across all of the key metrics on this topic.

National Energy Efficiency Action Plan (NEEAP) of São Tomé and Príncipe Page 7 of 92  
INTRODUCTION The sustainable industrial and socio-economic development of São Tomé and Príncipe (STP) is heavily dependent on reforming the energy sector and transitioning from an almost complete reliance on fossil

In collaboration with MRC, Gesto will work closely with the Government of São Tomé and Príncipe and various national stakeholders within the power sector. The project aims to strengthen the nation's capacity in renewable energy and energy efficiency through an extensive and targeted training programme.

Companies turn to the waters of São Tomé and Príncipe. Oil production is a decades-old dream for São Tomé and Príncipe, especially for its cash-starved government. The interest of oil companies in its Joint Development Zone (JDZ) with Nigeria peaked with record oil prices before 2014, and then faded.

Description: São Tomé and Príncipe (STP) is a country of opportunities. The energy resources are vast and are not limited to charcoal and firewood. The country has some water courses with enormous potential for producing electricity. There is sunshine throughout the national territory and for 12 months of the year.

São Tomé and Príncipe (STP) faces critical energy challenges that have been an obstacle to the country's economic growth. Only 60% of its population has access to electricity. To revitalize the sector and increase access, the Government aims to reduce the use of fossil fuels, scale up the use of renewables, and improve the public utility ...

São Tomé and Príncipe, a small island nation located in the Gulf of Guinea, is currently facing a critical challenge in its energy sector. The country's energy market is heavily dependent on imported fossil fuels, which are not only expensive but also contribute to environmental degradation and climate change.
